

The PTA and the Environmental Club are working together
to purchase and install:

WATER REFILL STATIONS!

Water will be cold-filtered so students are not drinking
room-temperature water.

Water will run through filters to further remove impurities.

Stations will reduce the spread of germs caused when
mouths/hands touch traditional water fountains.

Disposable/single-use water bottles require huge amounts
of oil to produce, huge amounts of gas to transport, and
bottles themselves are a significant solid waste disposal
issue. Plastic is very difficult to recycle.

These REFILL STATIONS have been met with great
enthusiasm at Hillside Avenue School!

The cost for each station is approximately \$1,200

**CONSIDER DONATING and/or HELPING WITH OTHER
FUNDRAISING EFFORTS TO MAKE REFILL STATIONS
POSSIBLE HERE AT CHS !**

***[Click Here](#) to donate, or contact the PTA board/Environmental Club at
chspta8@gmail.com to discuss how you can help!***
